

BER-PA Industrial marine sealing solutions

Propulsion systems

Marine engines

Auxiliary devices

BER-PA EXCELLENCE IN THE GASKET INDUSTRY SINCE 1984

Our company produces O-rings and seals for marine engines, auxiliary equipment and propulsion systems with high performance materials that can guarantee maximum resistance to marine environments (salt water and corrosion), offering low moisture absorption, maximum resistance to high temperatures and to highly corrosive fluids such as fuels and oils. www.ber-pa.it

Biofuel engines

Electric engines

Gas engines

BER-PA EXCELLENCE IN THE GASKET INDUSTRY SINCE 1984

O-Rings and specific sealing solutions able to guarantee maximum resistance to the highest temperatures, mechanical deformations and more aggressive chemical fluids such as lubricating oils, ecological fuels with additives and fuels of vegetable origin. BER-PA operates on a worldwide scale, creating O-rings and gaskets based on precise technical specifications and specifications provided by the major car manufacturers and by the interlocutors of the supply chain.
